

```
1 num=as.integer(readline(prompt="enter a number\n"))
2 if((num%%2)==0)
3 {
4   print("number is a even")
5 }else{
6   print("number is odd")
7 }
8
```

The screenshot shows the RStudio interface. At the top, there are three tabs: 'Environment', 'History', and 'Connections'. The 'Environment' tab is active. Below the tabs is a toolbar with icons for file operations (folder, save, copy, paste), memory usage (46 MiB), a brush, a menu, and a refresh button. Below the toolbar, the text 'R' is followed by a dropdown arrow, and 'Global Environment' is followed by a dropdown arrow. To the right is a search icon. Below this is a section titled 'values'. Under 'values', there is a table with two columns. The first column is labeled 'num' and the second column contains the value '5L'.

A screenshot of the RStudio interface. The top toolbar is visible, containing buttons for 'Files', 'Plots', 'Packages', 'Help', and 'View'. Below these are icons for navigation (left and right arrows), zoom (magnifying glass), export (document with arrow), and other functions. A horizontal scrollbar is shown below the toolbar, indicating the position of the current view within the workspace.

The screenshot shows an R console window with three tabs: "Console", "Terminal", and "Background Jobs". The "Console" tab is active. The R logo and version "R 4.6.0" are in the top left, and a search icon is in the top right. The console output is as follows:

```
> source("C:/Users/hoshe/Downloads/R Programming/0  
dd or Eve.R")  
enter a number:5  
[1] "number is odd"  
>
```
